PETITION TO MAKE SPECIAL

Hon. Commissioner of Patents
Washington, D.C. 20231

Sir:

The applicant in the above identified application hereby petitions the Commissioner to advance the examination of the instant application pursuant to Rule 102(c).

It is submitted that a first basis for the instant petition is applicant's age. As evidence of applicant's advanced age applicant herewith submits his Declaration indicating that on April 9, 2002 he will be ninety (90) years of age.

The second basis for the instant petition derives from the applicant's belief that the invention covered by the instant application will materially contribute to the discovery or development of energy resources.

Specifically, the application is directed to an Energy Finding Technique and Typical Useful Device. As stated in the Abstract "the disclosure recognizes that the quantity $-1/2 mv^2$ of kinetic energy representing Newton's

3rd law "equal and opposite reaction" not Einstein's $E=mc^2$ "rest energy" which completely obscures such energy truly represents available decay energy. A simple example of a device utilizing this kinetic energy as found in nature is provided to demonstrate this distinction, and a mathematical explanation is given of the new way to approach the energy problem.

In addition to the above, the applicant submits that while the important details disclosed in the instant application have not as yet been divulged, Dr. John H. Marburger, Scientific Advisor to President Bush and Mr. Gregory Fess, General Counsel, Brookhaven National laboratory do have some preliminary knowledge of the project.

It is suggested that the disclosure be referred promptly to the Department of Energy with the request that it be reviewed by someone with sound background knowledge of quantum mechanics and the work of Einstein.

In view of the above, it is respectfully submitted that the present application is suitable for advancement in examination and it is respectfully requested that the present petition be granted.

Respectfully submitted,

BUCKNAM AND ARCHER

Joseph J. Orlando

PETITION UNDER 37 C.F.R. 1.84(a)(2)

Asst. Commissioner for Patents
Washington, D.C. 20231

Sir:

The applicant in the above identified application filed contemporaneously herewith petitions the Commissioner of Patents under 37 C.F.R.1.84(a)(2) to accept the color drawing of Figure 13 in this application.

The reason for the present petition is that any competent scientist reading the disclosure will profit greatly by seeing the color version of the Table of Nuclides in Fig. 13. As explained on page 14 of the specification, versions of this Table are found in very recent publications which may not be familiar as yet to many such scientists. While it would not be feasible to include in the patent application the extensive detailed material available in the cited works, it is believed a great step forward will be taken by making available to the reader the fine color version.

*#3
Petition
to accept color
drawings*

Three sets of the color drawing of Figure 13 are submitted herewith as well as a black and white photocopy thereof.

A copy of an amended specification which includes the paragraph required by 37 C.F.R. 1.84(a)(2)(iv) is also submitted herewith. If the present petition is approved, this amended specification containing pages 1 to 17 may be substituted for the originally filed specification containing pages 1 to 16.

A check in the amount of \$130 covering the petition fee under 37 C.F.R. 1.17(h) is submitted herewith.

In view of the above, it is respectfully requested that the present petition be granted and that the color drawing of Figure 13 be entered.

Respectfully submitted,

BUCKNAM AND ARCHER
